

Smartpen Professional Development Bundle

Description

Our half day Workshop will show you and your staff how to use Livescribe leading edge technology for effective communication, quickly assess and document student performance, give students 24-7 access to their teacher's instruction and allow teachers to team and collaborate effectively for higher productivity.

After preparing lessons and assessments, staff will team and collaborate to determine how best to give students and their parents 24-7 access to this instruction and assessment, how to create individual student portfolios and how to store and share the lessons and assessments for later use or comparison.

What's Included

Each participant will receive an 8 GB Livescribe Smartpen, and all the appropriate peripherals including; small starter notebook, micro USB cable, Livescribe Desktop software, 2 ink cartridges, Getting Started Guide, MyScript software for text transcription, K-12 Deployment Guide, Echo 3D Recording Headset, Smartpen Portfolio and 500 MG of free space on the Livescribe portal for storage and sharing of lessons.

During these engaging four-hour Workshops, participants will receive hands-on instruction on how to integrate the Livescribe Smartpen using best practices in teaching and learning. Participants will:

- Use research-based note taking strategies
- Evaluate assessment techniques and methods
- Develop audio-enhanced learning aids for classroom use
- Create online multimedia instruction for student access
- Receive a free Smartpen to implement these instructional strategies

Customer Requirements

- Class size must be between 10-20 participants
- School must provide location for Workshop to be held
